## Psychotropic Medication Standing Orders

### 1) \*Stimulants and Amoxetine (Strattera) Work-up:

- EKG (baseline)
- Hepatic Function Panel (baseline) and then every 6 (six) months.
- Weight and height measurements
- Blood Pressure and Pulse recorded at initiation

### \*Stimulants and Amoxetine (Strattera) Monitor:

- Blood Pressure and Pulse recorded every 2 (two) weeks
- Monthly weight and height measurements
- Hepatic Function Panel every 6 (six) months

### 2) Tricyclic Antidepressants Work-up:

- EKG (baseline)
- CBC
- CMP

### Tricyclic Antidepressants Monitor:

- CBC every 6 (six) months
- CMP every 6 (six) months

EKG with any significant increase in dosage

### 3) Lithium Work-up

- CBC with Diff/Plts
- TSH
- CMP
- Pregnancy Test (for females)
- U/A
- Baseline EKG

### Lithium Monitor

- Lithium level weekly x 2 (two) weeks, then monthly
- TSH every 3 (three) months
- CMP every 3 (three) months
- U/A every 3 (three) months
- Annual EKG
- Pregnancy Test (for females) every 3 (three) months

### 4) Depakote Work-up

- CBC with Diff/Plts
- CMP
- Fasting Amylase and Lipase
- Pregnancy Test (for females)
- Hepatic Function Panel

Depakote Monitor

- Depakote level weekly x 2 (two), then monthly
- CBC w/Plts, Hepatic Function Panel, Fasting Amylase and Lipase every other month

5) Carbamazepine (Tegretol) Work-up

- CBC with Diff/Plts
- CMP
- EKG
- Pregnancy test (for females)
- Hepatic Function Panel

Carbamazepine (Tegretol) Monitor:

- Carbamazepine (Tegretol) level weekly x 2(two), then monthly
- CBC with Diff, Hepatic Function every other month

6) Alpha Antagonist: Clonidine and Guafacine (Tenex) Work-up:

- Baseline EKG
- Blood Pressure and pulse readings (sitting and standing) on initiation then once a day for 3 (three) days

Alpha Antagonist: Clonidine and Guafacine (Tenex) Monitor:

- Blood Pressure and pulse once every 2 (two) weeks
- Blood Pressure readings and pulse (sitting and standing) on any dosage increase or decrease then once a day for 3 (three) days

7) All Atypicals (SGA'S) including Clozaril Work-up:

- CMP (fasting)
- Lipid Profile (fasting)
- CBC with Diff/Plts
- Hepatic Function Panel
- Base line EKG
- Waist/Hip Ratio
- Weight
- Blood Pressure
- Pregnancy Test (for females)
- Potassium and Magnesium with Geodon only

Atypical (SGA'S)Monitor:

- Weight, Waist/Hip ratio monthly
- Fasting Plasma Glucose, CMP, Lipid Profile, Hepatic Function Panel, CBC with Diff/Plts after 1 (one) month then every 3 (three) months
- Potassium and Magnesium every 3 (three) months with Geodon only

Clozaril Monitor:

- All of the above
- Weekly CBC x 1 (one) month then every 3 (three) months
- Weekly White Blood Cell count

8) Effexor Work-up

- Blood pressure reading 3 (three) times per week x 2 (two) weeks.  
Notify MD if not within normal limits for age/size or Systolic >140

Effexor Monitor

- Blood pressure reading weekly. Notify MD if not within normal limits for age/size or Systolic >140

9) Trileptal Work-up

- BMP
- CBC with Diff/ Plts

Trileptal Monitor

- Monthly Oxycarbazepine Level
- Monthly BMP

10) Lamictal

- Call MD immediately for any signs or symptoms of a rash

11) Obtain drug levels on admission if the student arrives on the following medications:

- Lithium
- Depakote
- Tegretol
- Nortriptyline
- Trileptal

Initial Evaluation for students placed on Stimulants:

(Circle medication prescribed)

ADDERALL /XR

CONCERTA/METADATE/RITALIN /DAYTRANA  
 (methylphenidate)

FOCALIN/XR  
 (dexmethylphenidate)

DEXADRINE  
 (dextroamphetamine)

STRATTERA  
 (amoxetine)

Date stimulant was started: \_\_\_\_\_ Date of Admission: \_\_\_\_\_

*The following baseline history was obtained during the student's admission:*

PERSONAL/FAMILY HISTORY (Circle)	IF YES: WHO AND NATURE OF PROBLEM:
Hypertension      Yes      No	
Cardiovascular    Yes      No	

*The following baseline information was obtained during the student's admission:*

Weight (pounds):	<b>Fasting Labs:</b> _____ (Date completed) <b>Hepatic Function Panel:</b> Total Protein _____ Albumin _____ Alk Phos _____ SGOT _____ SGPT _____ Total Bili _____ Direct Bili _____ <b>Baseline EKG:</b>
Height (inches):	
Blood Pressure:	
Pulse:

 Medical Clinic

Initial Evaluation for students placed on SGA's:  
 (Second Generation Antipsychotics)

(Circle medication prescribed)

ABILIFY (Aripiprazole)    CLOZARIL (Clozapine)    GEODON (Ziprasidone)    RISPERDAL (Risperidone)    SEROQUEL (Quetiapine)    ZYPREXA (Olanzapine)

Date SGA was started: \_\_\_\_\_ Date of Admission: \_\_\_\_\_

*The following baseline history was obtained during the student's admission:*

PERSONAL/FAMILY HISTORY (Circle)			IF YES: WHO AND NATURE OF PROBLEM:
Obesity	Yes	No	
Diabetes	Yes	No	
Dyslipidemia (Elevated cholesterol or triglycerides)	Yes	No	
Hypertension	Yes	No	
Cardiovascular	Yes	No	

*The following baseline information was obtained during the student's admission:*

Weight (pounds):	<b>Fasting Labs:</b> _____ (Date completed)
Waist Circumference (inches):	Glucose: _____
Hip Circumference (inches):	Lipid Profile:
Waist/Hip Ratio:	Cholesterol: _____ Triglyceride: _____
Blood Pressure:	<b>Baseline EKG:</b> _____
AIMS Score of : _____ on _____ (Date)
